Work Experience

Monster Energy

Corona, California

DATA SPECIALIST

Aug 2026 - Present

- Analyze and audit invoice-level data across distributor/internal systems to identify discrepancies and maintain data accuracy and quality
- Utilize SQL queries and Python scripts to compile and validate data used to support reporting and forecasting processes
- Execute data maintenance requests while enforcing established data standards, governance rules, and validation requirements
- Analyze large datasets to identify inconsistencies, investigate root causes, and provide data-backed findings to stakeholders

Liferay Inc.

Diamond Bar, California

TECHNICAL WRITER

Mar 2026 - Jun 2026

- Created developer-facing guides and technical notes to support troubleshooting, onboarding, and cross-team knowledge sharing
- Collaborated with cross-functional teams to translate technical requirements into clear, user-friendly documentation/courses for stakeholders
- Submitted pull requests to update the Learning Management Systems (LMS) with documentation/courses to support newly released features
- Tested and validated course exercises and repositories by executing code, identifying defects, and verifying outputs across scenarios
- Proactively supported team deliverables for the Q1 2026 release, contributing beyond assigned scope to ensure on-time completion

Colorful Tours Inc.

San Gabriel, California

TECHNICAL CONSULTANT/PROJECT MANAGER

Sep 2024 - Feb 2026

- Consulted the company on overhauling deprecated procedures to align with modern standards improving maintainability across all projects.
- Supervised and trained four new hires, reducing on boarding time and ensuring consistency across project workflows
- Worked directly with 50+ vendors securing competitive rates and policies for our tour groups
- Organized client information using SQL servers, automating record-keeping and reducing manual work by 50%
- Recorded invoices and payments, ensuring accurate documentation and timely reporting

Merit Li-Lin Corp.

Arcadia, California

SOFTWARE ENGINEER/SUPPORT ENGINEER

June 2020 - June 2024

- Coordinated and resolved client tickets within 24 hours, ensuring timely communication and follow-up
- Reviewed and documented product defects (15% of newly released items) to improve quality and prevent recurring issues
- Maintained and updated software/hardware across 200+ deployed products, ensuring compliance and reliability
- Drafted internal documentation and technical notes for engineering and client teams
- Supported cross-functional projects, including training and validating AI models, requiring clear reporting and progress tracking

DrivenBI

Pasadena, California

SOFTWARE ENGINEER INTERN

June 2019 - Aug 2019

- Collected and organized large data sets (5GB/day) to support business reporting and decision-making
- Overhauled company website to improve user experience, increasing site traffic by 18%
- Produced competitive analysis reports and built internal productivity tools, improving workflows for project teams

Projects

Fabflix

SOFTWARE ENGINEER

Mar 2021 - Jun 2021

- Deployed a web & mobile application based on the Netflix streaming directory using Apache Tomcat for server deployment and management
- Secured and enhanced User accessibility by utilising password encryption, cookies, and reCaptcha Server authentication
- Optimized resource allocation for scalability with load balancing on multiple server instances
- Analyzed the differences in performance between the AWS and GCP to determine the most optimal hosting service

Peerify Chat

SOFTWARE ENGINEER

Mar 2020 - Aug 2020

- Developed a real-time peer to peer web based chat application utilising RTC peer connections
- Utilised Google Apps Scripts and GoogleSheets to store user login data and activity in order to act as a signaling "server" to connect users
- Integrated security and privacy using basic encryption protocols on chat and login data

Education

University of California, Irvine

Irvine, California

B.S. IN COMPUTER SCIENCE

Sept 2017 - Dec 2021

- Relevant Courses: Computer Network Security, Linear Algebra, Data & Web Applications, Machine/Data Mining
